

Updated Surprising facts About Schizophrenia & Psychoses 2022

Checking Numbers Of “cured” schizophrenics 1122

1. See C:\Users\Del User\Documents\AVH 6.0\Forum Counts

1. According to the Mental Health Foundation, between 5% and 28% of the population hears voices that other people do not. (<https://www.mirror.co.uk/news/real-life-stories/i-live-3-different-voices-20635818>)
2. Schizophrenia and related symptoms turned out to have human etiological factors
3. Schizophrenia turned out to be a small business venture, but not usually a sole proprietorship
4. Triggers turned out to be “cues”, in many or most cases, for behavioural activities pre-organised by the lodge leader
5. Phenomenology turned out to be extremely in need of some common sense dialectical and teleological reassessment
6. Motor vehicle damage(s), wilful damage, end to end crashes, and arson, turned out to be operations of the small business that schizophrenia turned out to be. Likewise the arson that is being discussed today and over the previous few weeks. The bringers of schizophrenia realised that after acquiring stolen credentials and hacked identity theft through visual observation and note taking of their client schizophrenic, they can insure the schizophrenics car themselves. Then they graft their friends, and have the motor vehicle incinerated on the basis of counterfeit, false, and falsified information. Then they make a claim on their victims car, and receive the payout.
7. Given the human etiology, it was and is very surprising, that the most compulsive perpetual deceivers and liars on planet earth are nearly always believed by the brethren (their friends).
8. It became evident, that schizophrenia had anosognosia prevalent in the perpetrators, significant diathesis, and was able to be wilful largely because of multiple concomitant pathologies.
9. It was surprising that so many people, often very proud of their good health and relatively drug free status (compared to their poor miserable victims), have such poor and diminished mid term and long term memories.
10. It was surprising the levels of hypocrisy that are available and ubiquitous in causing schizophrenia.
11. It is surprising the damage that Sigmund Freud has done to psychiatry, especially in the field of schizophrenia spectrum disorders.
12. Given the human etiological imperatives demonstrated in the online schizophrenia forums, it is amazing that psychiatrists are unable to get to begin considering the potential mechanisms that may be involved with achieving human connectome interactions that are taking place.
13. It is surprising that there exists no realisation that vivid mental imagery (the Freemason secret handshake) is not recognised as eidetic and commensurate with psychosis.
14. I was quite surprised to discover that all the perpetrators of schizophrenia are in contact with each other by email.
15. I was not surprised to find out that they are often Freemasons. Not at all after checking and reading Freemason websites.
16. I was hardly surprised to learn very early on that these human disease initiators and vectors blame the wilful acts on narcotics being used by the victims.
17. I was definitely surprised when I was told by the black hat actors that none of them can drive a motor vehicle. As it happens, the visual vector of telepathy impedes the ability to control a motor vehicle so much that none of them own cars and none of them can drive cars.
18. Since realising that the humans who instantiate and perpetrate schizophrenia can see, objectively they tell me, but somehow, I was only marginally surprised to realise that by robbing schizophrenics of their welfare payments by observing their internet banking access credentials, schizophrenics are substantially funding the 1.2B porn videos on the WWW and the pornography sites that display these “visual depictions”. Since this point in time realisation, I was again only marginally disturbed, but completely miserable, inconsolable, upset, dejected, heart-broken and saddened so sufficiently to contact Joseph Biden, to let him know that of the 1.2B pornographic videos, only maybe 2M or more websites contain children, and hence less than 3.5 million US children are probably missing (check ID Care on the Freemason websites), and then fortunately only a small proportion of these children get sex trafficked to other nations where they can enjoy many years of unpaid forced labour as domestic servants, in great places like Saudi Arabia and Nigeria.
 - a) As a result it can be asserted that it is not the experience of voice hearing per se, or features predisposing AVH onset that are associated with psychological dysfunction. Why the developmental trajectories are “triggered” in some during childhood rather than adolescence has not been investigated. Given that younger age of onset of AVH seems to be associated with healthy voice hearing suggests this is worthy of investigation.

- b) Clinical voice hearers reported significantly more incidences of childhood sexual abuse than non-clinical. Seventy-eight percent of clinical voice hearers also demonstrated symptoms indicative of DSM-IV post-traumatic stress disorder (PTSD).
- 19. I was not at all surprised when I discovered after my first calculations, that the extent of the error I set out to properly alleviate by conducting an informed epidemiological estimate of the true lethality of schizophrenia. Based on expertise unavailable to inexperienced epidemiologists, the margin of error that was introduced by nativity, stemming from uninformed inexperience and lack of knowledge regarding the composure of authoritative death certificates, was reduced. That is to say, the adjustment that I set out to correct, was an amplification of the existing studies. I was quite surprised though when after undertaking many more hours of investigation, even my upwards adjustment was found to be an underestimate, to the order of approximately 88%. I will continue to be surprised if this stated proper estimate that more adequately accounts for the qualified estimates in conventional studies where the authoritative death certificates can not incorporate indications of suicides, is maintained at this level, that is 88%.
- 20. I was less surprised than disappointed in the measure of time it took me to gain cogency over the fact that anti-psychotics, are not anti-schizophrenics.
- 21. I was barely unsurprised when it came to light that of the number of individual humans available for inquiry through my own schizophrenic telepathy, none or not one of them had not been sexually assaulted as a child. And such a practice, called "activation" is no less (and could not be any more), practised these days.

January 2023

- 22. I was disabled by surprise, when after consuming narcotics, as I do, but wish I didn't, I became totally psychotic after a particular batch. During this disabling 3 days, I was given permission, by God *et al*, to utilise my fear inducing pseudo-science as the basis for action, against the "forces of evil", as they presented in the "quizzical" manner incorporating all the usual characters (JD, JD's henchman Ghosts, Freemasons of English speaking Earth, identity theft, financial fraud against me, derailing grandiosity and other delusions etc), but bringing more than usual costs and negative consequences. Anyhow, I was supported and directed by Intergalactic reps to undertake dealing with this scenario, in my own personal way. I was told, "do it Scott. You have permission. Do what you have to do, and accept that we want and ask you to do it, in the manner you have at your disposal. We want you to." So I did. And it was strange. It included deprecating all the known laws of this universe, superseding them with my Classical-Quantum Bridge nonsense, and even setting aside conventional mathematical designations for more 2D ones....
- 23. I will remain aghast, at the few mentions of my voices, regarding their (undisclosed non-specific) knowledge of the saga of that psychosis. One I hoped would be the last. It began with JD claiming she had been "renting" me and my mind out to other (international) Freemasons, to gain tools and knowledge experience from the psychosis I succumb to. Two other current voices have nearly tripped, or expertly played me, by nearly mentioning something indicating that they know the chronology and details of the psychotic saga I was injured by.

2023

After another wanking session, ending in me "losing", in the absence of any utterance indicating what "you lose" actually means, I am compelled to officially publish the following 3 methods of eliminating the images of child sexual exploitation: (to be used individually and in combination):

- 1) Identify any website that is not indexed
- 2) Identify any site that have only < 5 inbound links, and hundreds of outbound links
- 3) Identify any sites that have URL's matching the CIA/FBI/Meta/REDDIT aggregated AI prohibiton from publication rules
